**Ref: 23-340**

By Email

Dear Sir/Madam

Thank you for your request for information under the Freedom of Information Act 2000. The Trust's response is as follows:

- We can confirm that we do not hold the information you are requesting

**How many individuals were identified to have a CACNA1C gene change as a result of genetic testing during the year 2022 and during the year 2021?**

**When a genetic change is found it is categorised according to the ACGS Guidelines (Association for Clinical Genomic Science). Ideally your response to how many individuals identified would indicate the classification of the findings with regard to number of individuals ie. Pathogenic, Likely pathogenic, Variant of Uncertain Significance, Likely benign and Benign.**

**In your answer, it would be helpful to know within the National Genomic Test Directory which panels were used to identify these individuals and your catchment area please.**

We do not hold this information. Please contact the South West Genomics Laboratory Hub at North Bristol NHS Trust at [foi@nbt.nhs.uk](mailto:foi@nbt.nhs.uk)

This concludes our response. We trust that you find this helpful, but please do not hesitate to contact us directly if we can be of any further assistance.

If, after that, you are dissatisfied with the handling of your request, you have the right to ask for an internal review. Internal review requests should be submitted within two months of the date of receipt of the response to your original letter and should be addressed to:
